

Fincase is a superior solution for enhancing acoustic performance in any space. Made from mineral fiber, feature a distinctive fissured pattern that not only adds aesthetic appeal but also offers excellent sound absorption capabilities. With an impressive NRC (Noise Reduction Coefficient) rating of 0.65, Fincase panels effectively mitigate background noise, minimizing distractions and creating a more tranquil environment.

These tiles prove to be an ideal choice for various settings, finding widespread application in commercial and public establishments. Offices, retail spaces, factories, educational institutions, and healthcare facilities can all benefit from the acoustic advantages that Fincase ceiling tiles bring. By reducing reverberation and echoes, they help optimize the overall auditory experience, fostering improved focus and comfort for occupants.

Upgrade your space with Fincase ceiling tiles and experience the transformative effects they bring to sound management. Whether you seek a serene atmosphere for increased productivity or a peaceful environment for relaxation, Fincase is the ultimate acoustic solution for modern interiors.

PRODUCT FEATURES

- ✓ Excellent sound absorption ability
