FLEXIBLE NEW SYSTEM - LIGHTWEIGHT, SLENDER AND ROBUST

Improved with increased flexibility and reduced weight

Outstanding design achieves 45dB in sound reduction

DORMA Hueppe has yet again challenged the movable walls industry with a newly designed entry level system which has a lighter weight and yet is robust and flexible. In addition, the thickness of the wall is at 85mm only. This is made possible with innovative design of the new profiles which improved acoustics on top of the other advancements of the sealing system. The steel-aluminum bolted construction enables rigidity and ease of maintenance. This lighter weight further enhances operational efficiency.

Space savings in the storage area

SimFlex

Benefits at a glance

- Light weight, easy handling
- Space saving panel thickness
- Increase flexibility with angled walls
- No visible fasteners
- Robust scissor jack mechanism
- Replaceable surface boards

Simple, Flexible. The new facts.

Dimensions

Element thickness: 85mm

Element width: 600-1200mm

Clear overhead height: 2000-4000mm

Design

Steel-aluminum bolted frame construction

Element types

Fullwall, Telescopic, Single Passdoor, Fixed-door, Corner & Angled element.

Operation: Manual only

Sound rating: R_w, P^* 45dB

Weight per unit area: 30KG/m²

Surface: Optional with laminates, fabrics

*Laboratory values EN ISO 10140-2
